

Mao ni ako mga gipang tang² under account folder > accounts.controller.js file
Kanang mga light blue functions na sya mao na ako mga gipang kuha.

```
router.post('/refresh-token', refreshToken);  
router.post('/revoke-token', authorize(), revokeTokenSchema, revokeToken);  
router.post('/register', registerSchema, register);  
router.post('/verify-email', verifyEmailSchema, verifyEmail);
```

Kani sa account.service.js under account folder gihapon
Naa sad ko gipang tang² ari nga dili part sa authorization crud.

```
est.js U  account.service.js U X  config.json U  JS s  
Backend > accounts > account.service.js > ...  
1  const bcrypt = require('bcrypt');  
2  
3  
4  const crypto = require("crypto");  
5  const { Op } = require('sequelize');  
6  const sendEmail = require('../helpers/send-email');  
7  const db = require('../helpers/db');  
8  const Role = require('../helpers/role');  
9  
10 module.exports = {  
11     forgotPassword,  
12     validateResetToken,  
13     resetPassword,  
14     getAll,  
15     getById,  
16     createAccount,  
17     updateAccount,  
18     deleteAccount  
19 };
```
